AGENCY: Nuclear Regulatory Commission.

ACTION: Draft NUREGs; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is making available for public comment the following draft NUREGs: NUREG-1280, Revision 2, "Acceptable Standard Format and Content for the Material Control and Accounting (MC&A) Plan Required for Strategic Special Nuclear Material;" NUREG-2159, "Acceptable Standard Format and Content for the Material Control and Accounting (MC&A) Plan Required for Special Nuclear Material of Moderate Strategic Significance;" NUREG-1065, Revision 3, "Acceptable Standard Format and Content for the Material Control and Accounting (MC&A) Plan Required for Special Nuclear Material of Low Strategic Significance;" NUREG-2158 (formerly NUREG/CR-5734), "Acceptable Standard Format and Content for the Material Control and Accounting (MC&A) Plan Required for Low Enriched Uranium Enrichment Facilities;" and NUREG/BR-0096, Revision 2, "Instructions and Guidance for Completing Physical Inventory Summary Reports." The NUREGs support a proposed rule (RIN 3150-AI61; NRC-2009-0096) amending the NRC's MC&A regulations applicable to various types of special nuclear material (SNM). The proposed rule is being published in the Proposed Rule section of this issue of the *Federal Register*.

II. Discussion.

Draft NUREGs 1280, 2159, and 1065 provide fuel cycle licensees (*i.e.*, those authorized to hold strategic SNM, SNM of moderate strategic significance, and SNM of low strategic significance, respectively) guidance to facilitate compliance with applicable provisions in part 74 of Title 10 of the *Code of Federal Regulations* (10 CFR), “Material Control and Accounting of Special Nuclear Material.” Draft NUREG-2158 provides similar guidance to the subset of licensees authorized to hold SNM of low strategic significance who engage in uranium enrichment operations. Except for NUREG-2159 – which is a new NUREG for any future licensees and applicants who may request authorization to hold SNM of moderate strategic significance – the NUREGs would revise existing guidance. The NUREGs are being revised to

incorporate the proposed changes and enhancements to 10 CFR part 74.

Generally, the four draft guidance documents discuss acceptable methods licensees and applicants may use to prepare and implement their MC&A plans, and how the NRC will review and inspect these plans. Additionally, these four draft NUREGs address: 1) the proposed general performance objectives; 2) the proposed MC&A program capabilities to meet those objectives; and 3) the incorporation of checks and balances to detect falsification of data and reports that could conceal the theft or diversion of SNM. The SNM licensees can find instructions on the following in NUREG/BR-0096: 1) using NRC Form 327 to report inventory differences (IDs) and 2) associated information needed to evaluate IDs. Such IDs may result from the physical inventories required by 10 CFR 74.31(c)(5), 74.33(c)(4), 74.43(c)(7), or 74.59(f). We are revising NUREG/BR-0096 to update and clarify its terms.
